Subject: juvenile detention options

Hello to Perry Huston and Dennis Rabidou/ I am not an expert on juvenile detention issues/and recognize there are several particulars/but/I am definitely in the public sector that has concerns about transport of juvenile offenders out of their home territory and the territory where they have support connection and also have responsibility for their behaviors.

Yes/looking at short term but more important at longer term behavior outcomes/please include this in your evaluations/and also for financial investment/short term and longer term. When is a savings not a savings?

Thank you/
