Subject: marijuana

I am writing once more to voice more concerns regarding the marijuana issue. I have talked to many people over the past few weeks. I have not talked to one in favor of keeping this unfortunate intrusion on our rural lifestyle and values. I do wish that more of them would voice their concerns, but it is typical of local people to not be confrontational as are the growers and investors. We don't live in this county because we want to be rich, we live here because it is a comfortable way to live and much more. The extremely sad thing is how this has affected people with grows right next to their residences, it has turned their lives upside down. Many of these people I know. There seems to be no remorse at all from the people involved in these operations. They are rude and made fun of people when they spoke at the public meeting at the agriplex. Most are not from this area, so they are not bringing jobs here. The investors are already rich and just looking for more money at the expense of all of us. Please do not allow more lives to be ruined by greed, because that is what it boils down to. I would think that you have chosen to live here because of what this county had to offer before this mess happened. I truly hope you do the right thing for the residents who are suffering or may be next in line to have a grow next to them.

Sincerely,
Carlene Denison
