Subject: zoning plan update

To Zoning decision-makers/
Concerning the recent deluge of public input for and against marijuana growing farms/

I do not use marijuana, I have some concerns about some marijuana use that I see in others, and I have some concerns about the recent statewide legalization. HOWEVER/the marijuana issue should not displace attention to the most overriding zoning issues of wildfire/water/sewage/and building density.

Marijuana farming is a significant issue/should be addressed/but addressed within the larger structure of zoning planning and guidelines.

Thank you/
